Q2 METALS

THE CISCO LITHIUM PROJECT

EEYOU ISTCHEE, JAMES BAY - QUEBEC, CANADA

TSX.V: **QTWO** | OTCQB: **QUEXF** | FSE**: 458**

FORWARD-LOOKING STATEMENT

THIS PRESENTATION CONTAINS CERTAIN FORWARD-LOOKING STATEMENTS

that reflect the current views and/or expectations of Q2 Metals Corp. (the "Company" or "Q2") with respect to its business and future events including statements regarding its exploration plans and the Company's expectations respecting future exploration results, the markets for the minerals underlying the Company' projects, and growth strategies. Forward-looking statements are based on the then-current expectations, beliefs, assumptions, estimates and forecasts about the business and the markets in which the Company operates. Investors are cautioned that all forward-looking statements involve risks and uncertainties, including: the inherent risks involved in the exploration and development of mineral properties, the uncertainties involved in interpreting drill results and other exploration data, the uncertainties respecting historical resource estimates, the potential for delays in exploration or development activities, the geology, grade and continuity of mineral deposits, the possibility that future exploration, development or mining results will not be consistent with the Company's expectations, accidents, equipment breakdowns, title and permitting matters, labour disputes or other unanticipated difficulties with or interruptions in operations, fluctuating metal prices, unanticipated costs and expenses, uncertainties relating to the availability and costs of financing needed in the future and regulatory restrictions, including environmental regulatory restrictions. These risks, as well as others, including those set forth in the Company's filings with Canadian securities regulators, could cause actual results and events to vary significantly. Accordingly, readers should not place undue reliance on forward-looking statements and information. There can be no assurance that forward-looking information, or the material factors or assumptions used to develop such forward looking information, will prove to be accurate. The Company does not undertake any obligations to release publicly any revisions for updating any voluntary forward-looking statements, except as required by applicable securities law.

Neil (Sage) McCallum, B.Sc., P.Geol, is a Qualified Person as defined by NI 43-101, and a registered permit holder with the Ordre des Géologues du Québec and member in good standing with the Professional Geoscientists of Ontario. Ms. McCallum has reviewed and approved the technical information in this presentation. Ms. McCallum is a director and the Vice President Exploration for Q2.

Mineral resources which are not mineral reserves do not have demonstrated economic viability. With respect to "indicated mineral resource" and "inferred mineral resource", there is a great amount of uncertainty as to their existence and a great uncertainty as to their economic and legal feasibility. It cannot be assumed that all or any part of a "measured mineral resource", "indicated mineral resource" or "inferred mineral resource" will ever be upgraded to a higher category.

CAUTIONARY NOTE TO US INVESTORS REGARDING RESOURCE ESTIMATES

The terms "mineral resource", "measured mineral resource", "indicated mineral resource", "inferred mineral resource" used herein are Canadian mining terms used in accordance with NI 43-101 under the guidelines set out in the Canadian Institute of Mining and Metallurgy and Petroleum (the "CIM") Standards on Mineral Resources and Mineral Reserves, adopted by the CIM Council, as may be amended from time to time. These definitions differ from the definitions in the United States Securities & Exchange Commission ("SEC") Industry Guide 7. In the United States, a mineral reserve is defined as a part of a mineral deposit which could be economically and legally extracted or produced at the time the mineral reserve determination is made. While the terms "mineral resource", "measured mineral resource," "indicated mineral resource", and "inferred mineral resource" are recognized and required by Canadian regulations, they are not defined terms under standards in the United States and normally are not permitted to be used in reports and registration statements filed with the SEC. As such, information contained herein concerning descriptions of mineralization and resources under Canadian standards may not be comparable to similar information made public by U.S. companies in SEC filings. Accordingly, information herein containing descriptions of our mineral deposits may not be comparable to similar information made public by US companies subject to the reporting and disclosure requirements under US federal securities laws and the rules and regulations thereunder.

THIRD-PARTY INFORMATION

Where this presentation quotes any information or statistics from any external source, it should not be interpreted that the Company has adopted or endorsed such information or statistics as being accurate. Some of the information presented herein, including scientific and technical information on third-party projects, is based on or derived from statements by third parties, has not been independently verified by or on behalf of the Company and the Company makes no representation or warranty, express or implied, respecting the accuracy or completeness of such information or any other information or opinions contained herein, for any purpose whatsoever. References to third-party projects herein are for illustrative purposes only and are not necessarily indicative of the exploration potential, extent or nature of mineralization, or potential future results of the Company's projects.

THE

CISCO

LITHIUM PROJECT

Largest spodumene lithium resource in the Western Hemisphere and among the largest, globally.

Q2 METALS

Q2 METALS

TIER-1 LITHIUM PROJECT IN QUEBEC CANADA

Scale

297 Mt
@ 1.36% Li_2O
Largest spodumene lithium resource in Western Hemisphere

Economics

C$13.5B
After-tax NPV_8
38.7% IRR
3-year payback

Infrastructure

~150km
to Matagami
Transshipment facility;
Established transportation to battery supply chains

Growth

1.7 Mtpa
SC5.5 Production
28-year mine life
~220kt LCE/year

Cisco combines scale, robust project economics and proximity to established transportation infrastructure, positioning it among the most significant undeveloped spodumene lithium projects globally.

Q2 METALS

2026 PEA HIGHLIGHTS

Assumptions: US$1,647 (FOB Quebec ports) | 8% Discount | SC5.5

Post-Tax NPV_8

MAY 2026 MINERAL RESOURCE ESTIMATE

297Mt @ 1.36% Li2O establishes Cisco as one of the world's largest spodumene lithium resources

- May 2026 Inferred MRE based on **75 holes** drilled for **33,343 m**.
- Deposit remains open in all directions with multiple high potential targets across the broader 41,253-hectare project area.

	Scenario	Cut-off (% Li_2O)	Mass ('000 t)	Li_2O (%)	Li_2O ('000 t)	LCE ('000 t)
Inferred	Open Pit	0.4	271,575	1.37	3,724	9,208
	Underground	0.7	25,802	1.30	335	829
	Total	Combined	297,377	1.36	4,059	10,037

Mineral Resources were prepared in accordance with National Instrument 43-101 – Standards for Disclosure of Mineral Projects ("NI 43-101") and the CIM Definition Standards (2014). Mineral Resources that are not Mineral Reserves do not have demonstrated economic viability. This estimate of Mineral Resources may be materially affected by environmental, permitting, legal, title, taxation, sociopolitical, marketing, economic, or other relevant issues. The independent Qualified Person (QP), as defined by NI 43-101 for this estimate is Todd McCracken, P.Geo., Director – Mining & Geology – Central Canada, BBA. The Effective Date of the estimate is May 26, 2026. Both underground and open-pit conceptual mining shapes were applied as constraints to demonstrate reasonable prospects for eventual economic extraction. Cut-off grades for open-pit constrained resources are 0.40% Li2O, and for underground constrained resources is 0.70% Li2O. Open-pit and underground Mineral Resource constraints are based on a spodumene concentrate price of US$1,500/tonne (6% basis FOB Bécancour) and an exchange rate of 0.70 USD/CAD.

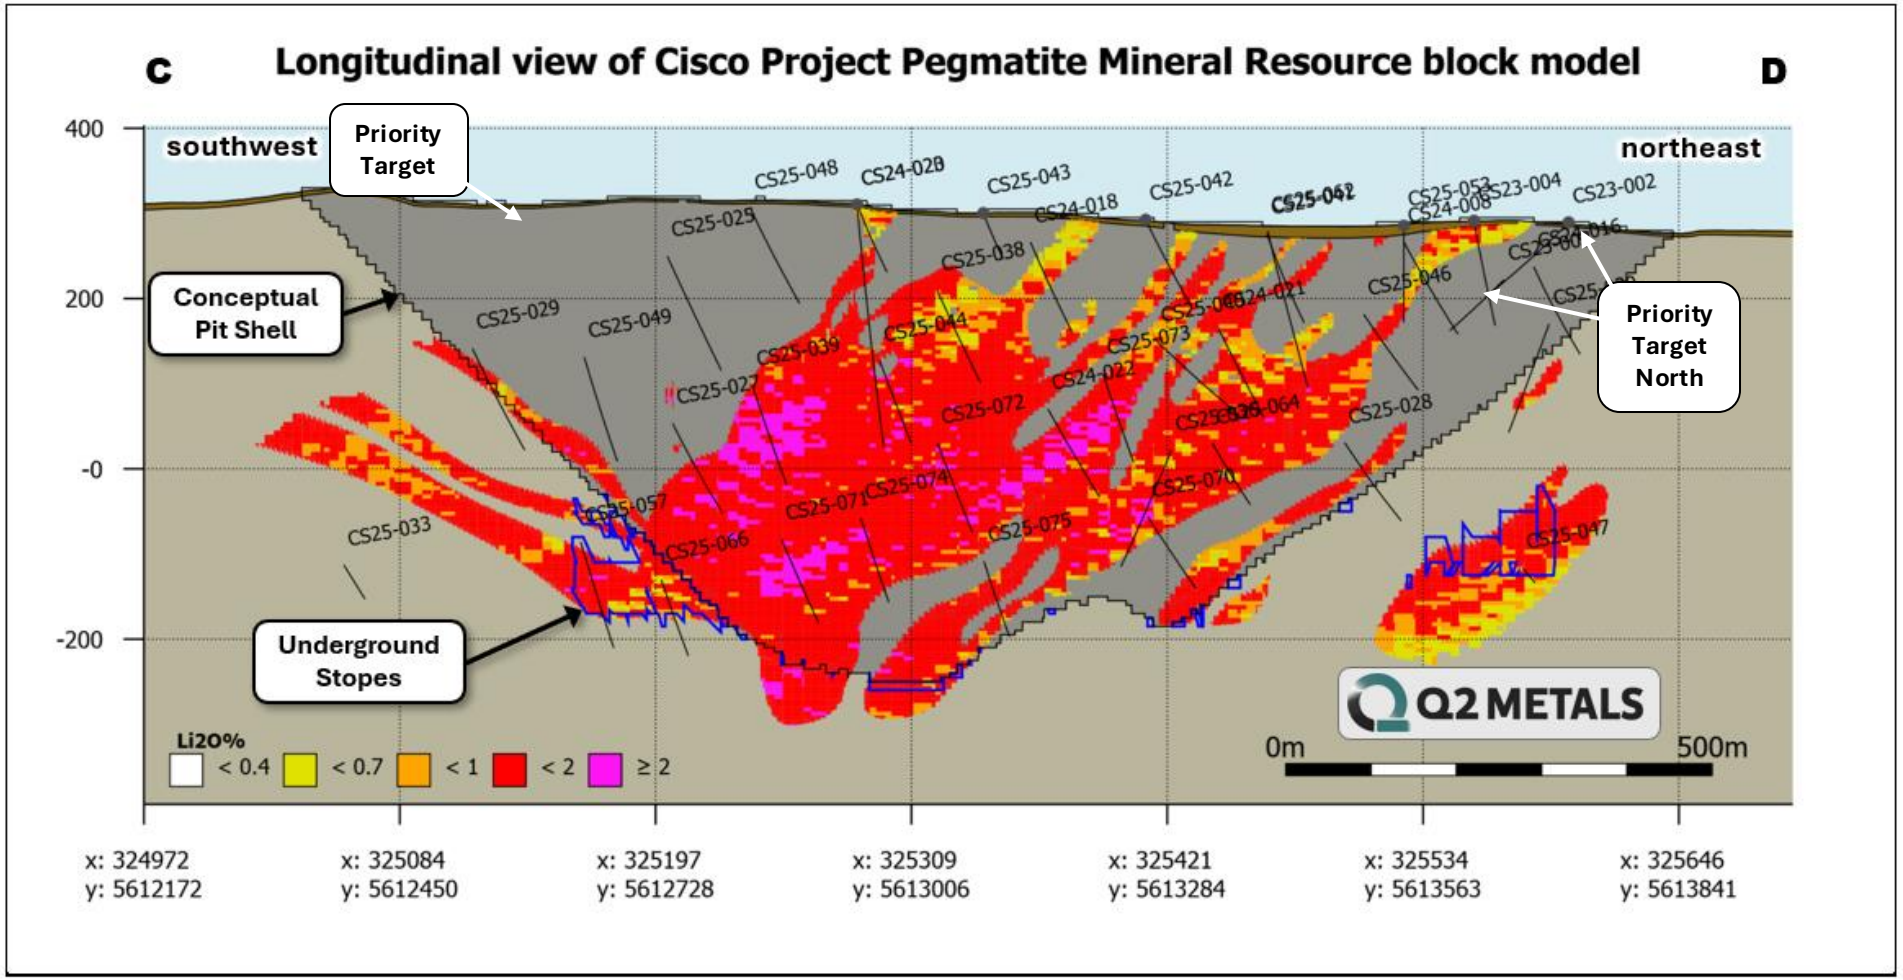

Mineral Resource Estimate and Exploration Target at the Cisco Project

The potential quantity and grade of the 2026 Exploration Target are conceptual in nature and there has been insufficient exploration to estimate and define a Mineral Resource, as defined by NI 43-101. It is uncertain if further exploration will result in the target being delineated as a Mineral Resource.

MAY 2026 MINERAL RESOURCE ESTIMATE

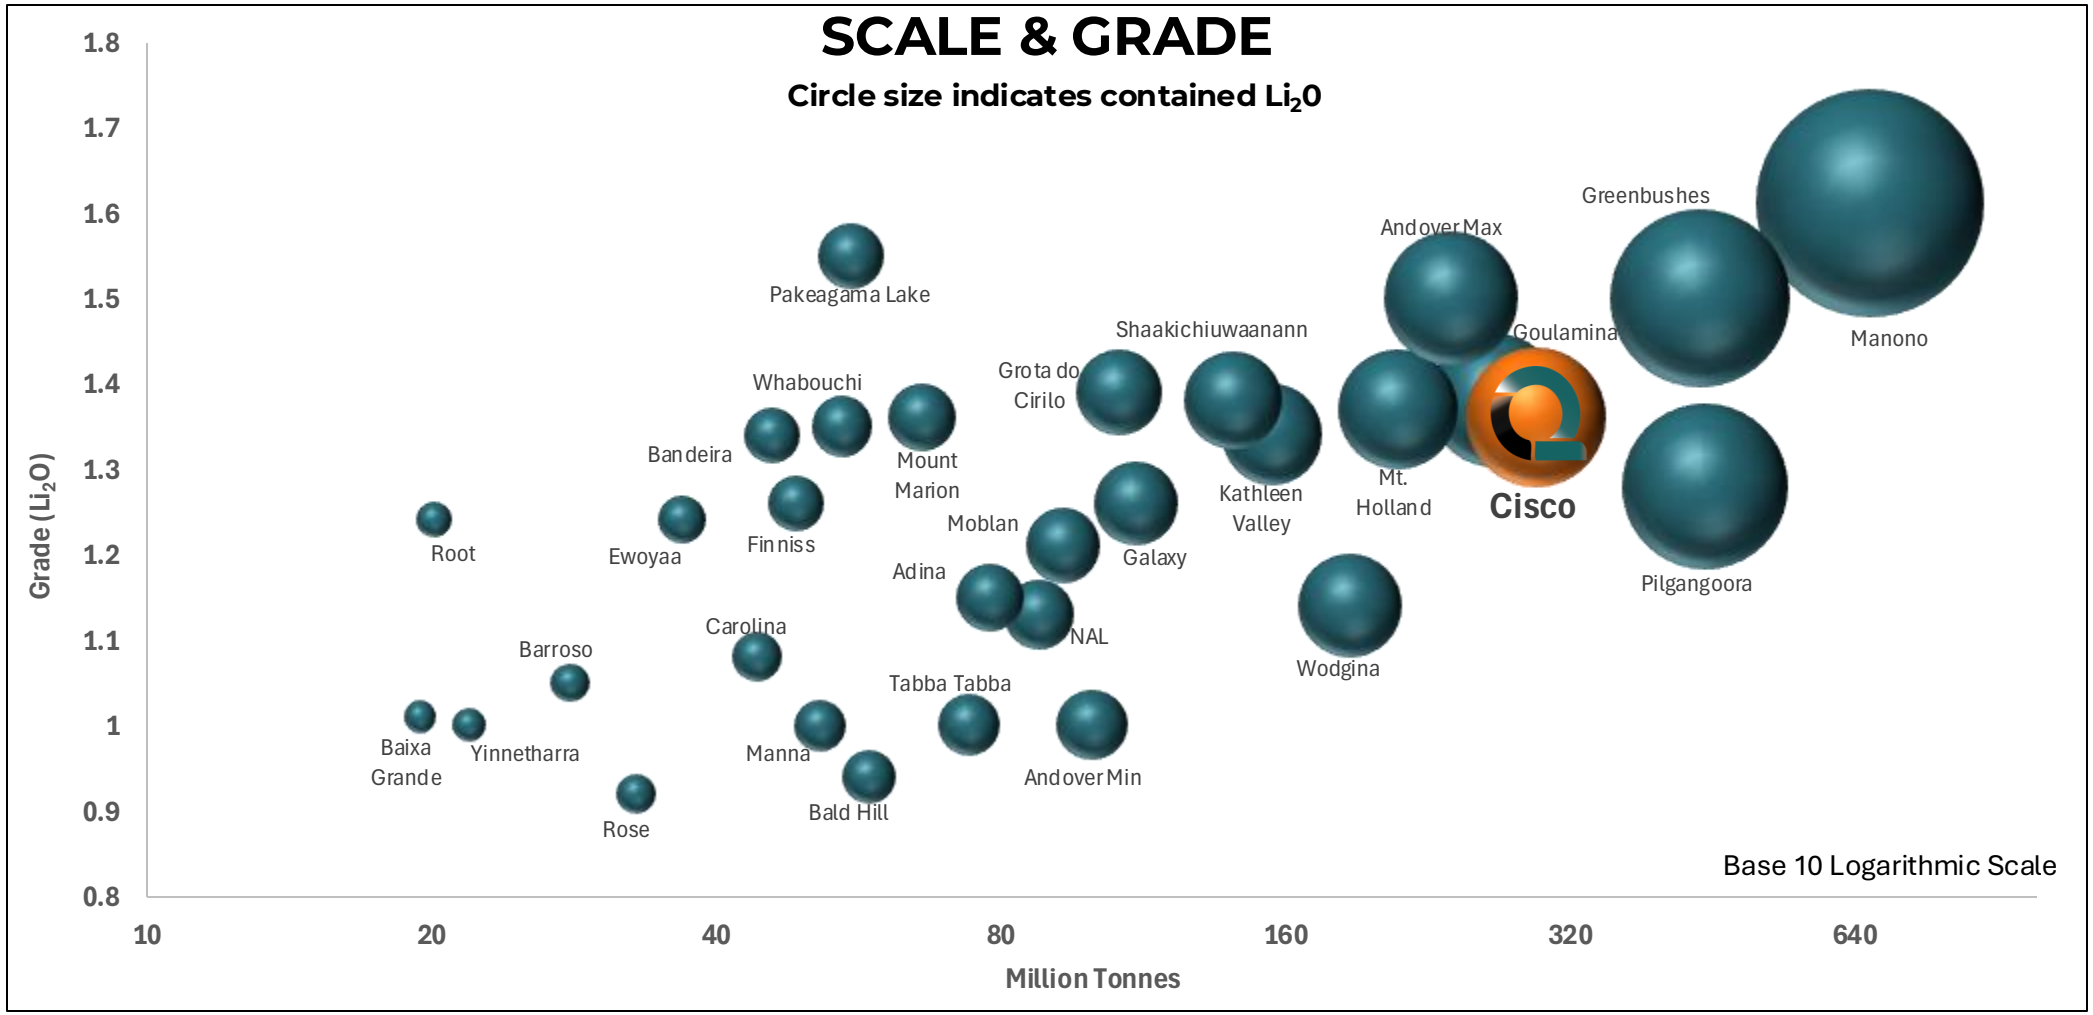

Conceptual Pit Shell

Q2 METALS

GLOBAL PEER COMPARISON

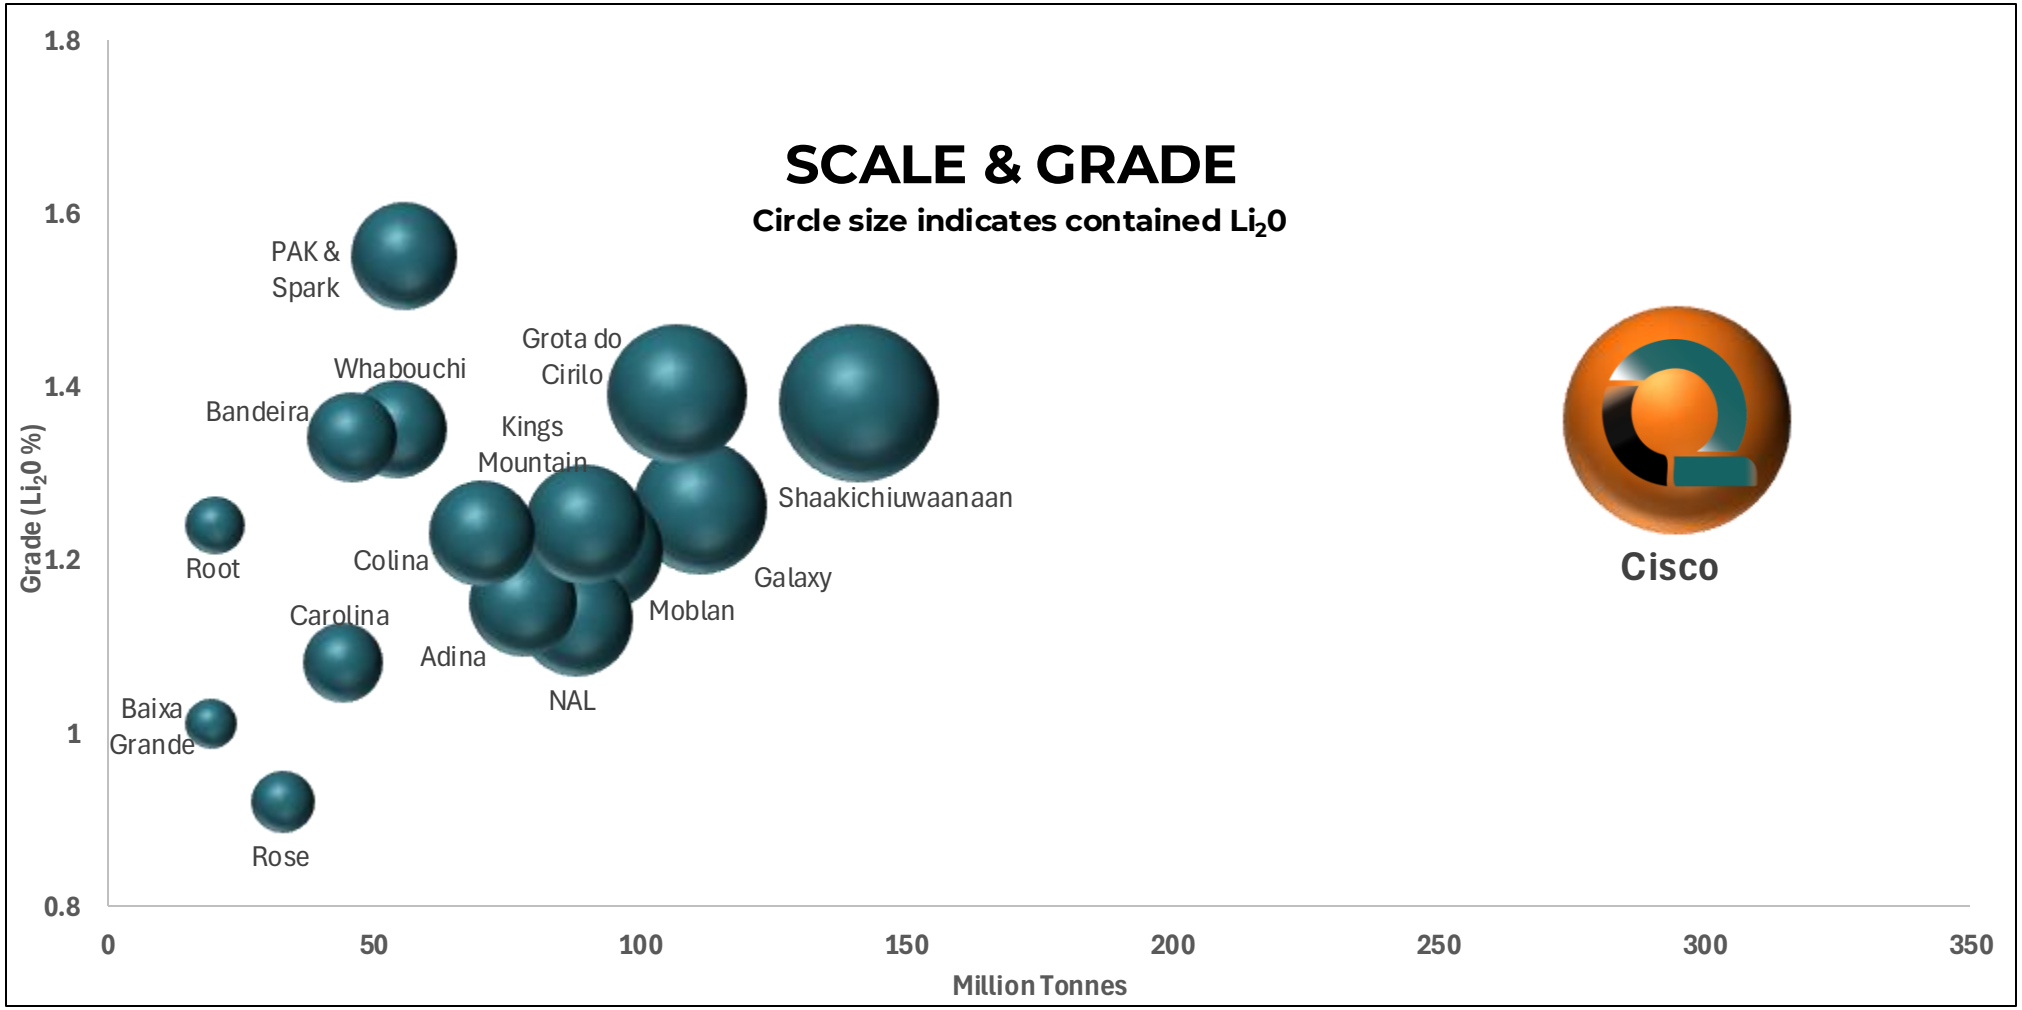

Cisco combines top-tier scale with competitive grade

See Global Peer Reserves/Resources Table in Appendix

WESTERN HEMISPHERE PEERS

Cisco is the largest spodumene lithium resource in the Western Hemisphere by tonnage

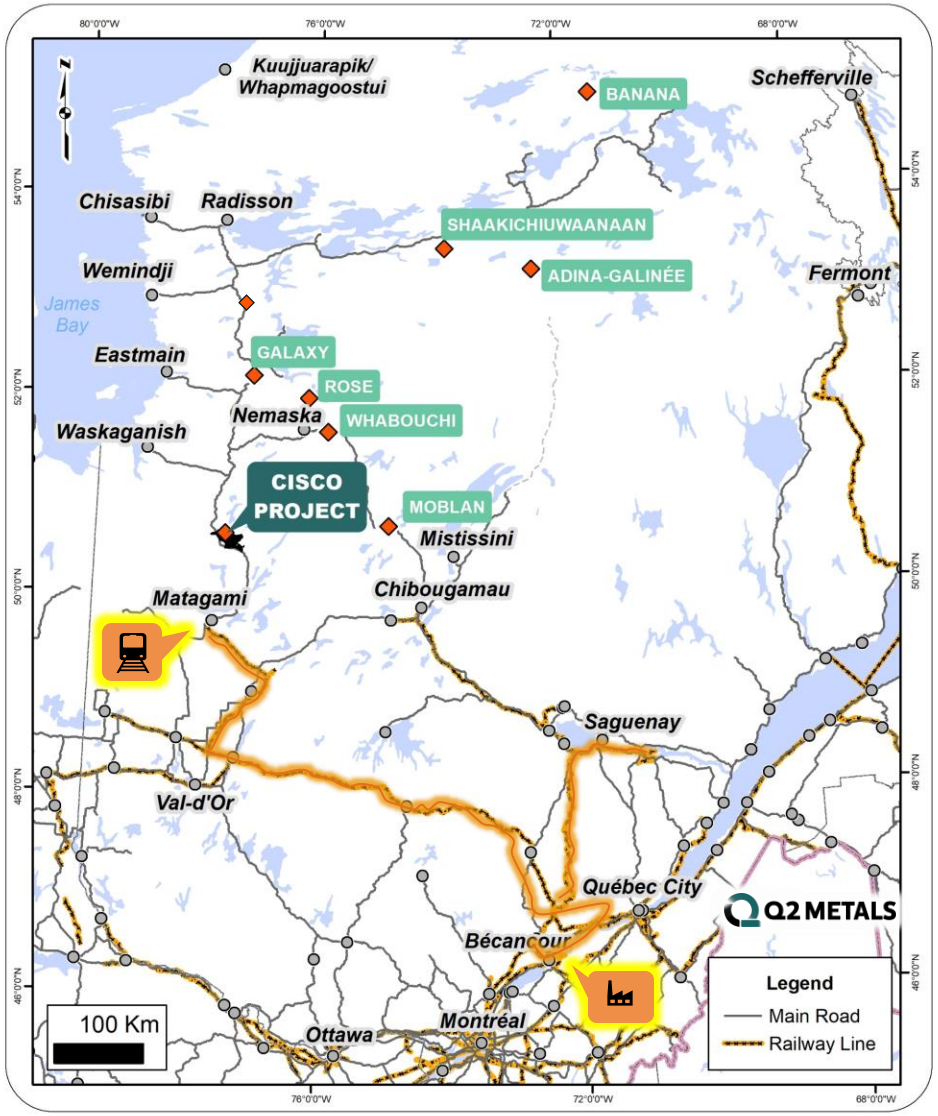

See Peer Reserves/Resources Table in Appendix

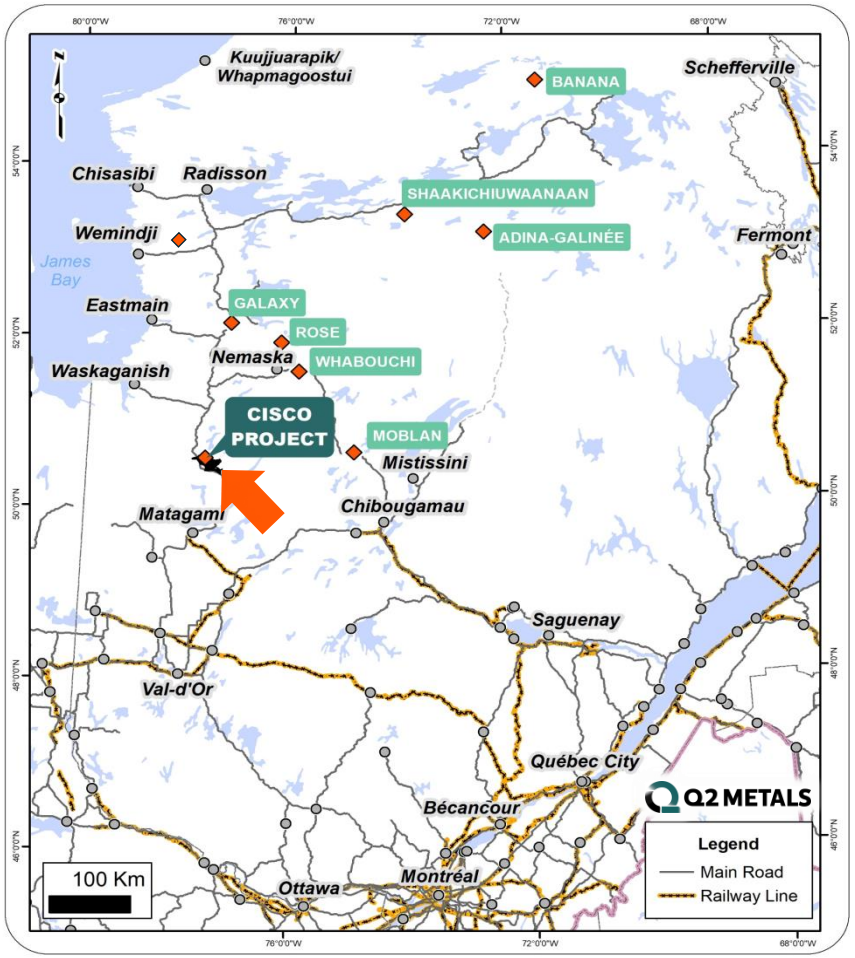

LOCATION ADVANTAGE

Transportation

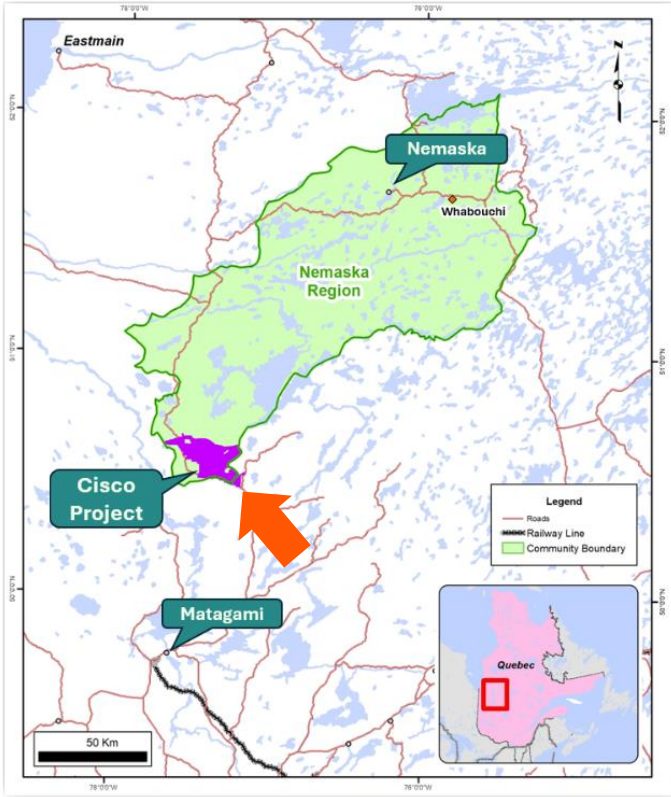

- Only ~150km from the Matagami Transshipment Facility.
- One of the shortest haul distances among major James Bay lithium developments.
- Existing highway access eliminate the need for additional transportation infrastructure development
- Rail connects to international port facilities along the St. Lawrence Seaway as well as Bécancour, ~215 km from the US border.

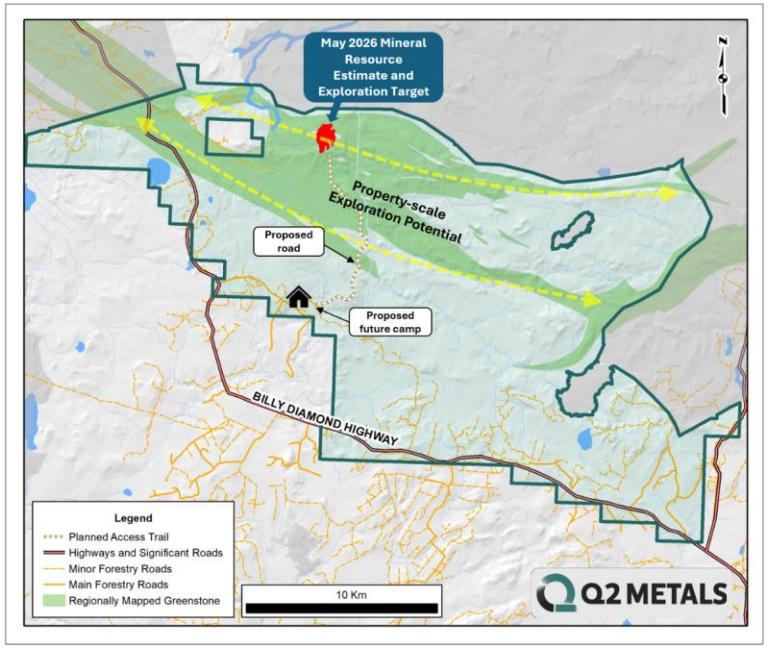

WHERE IS CISCO?

The Cisco Project is in the southernmost part of the Eeyou Istchee James Bay region of Quebec Canada

Within the traditional territory of the Cree Nation of Nemaska

Cisco covers 801 contiguous mineral claims over 41,253 ha along the Frotet Evans Greenstone Belt.

GEOLOGY

TOTAL DRILLED AS AT NOVEMBER 10, 2026:

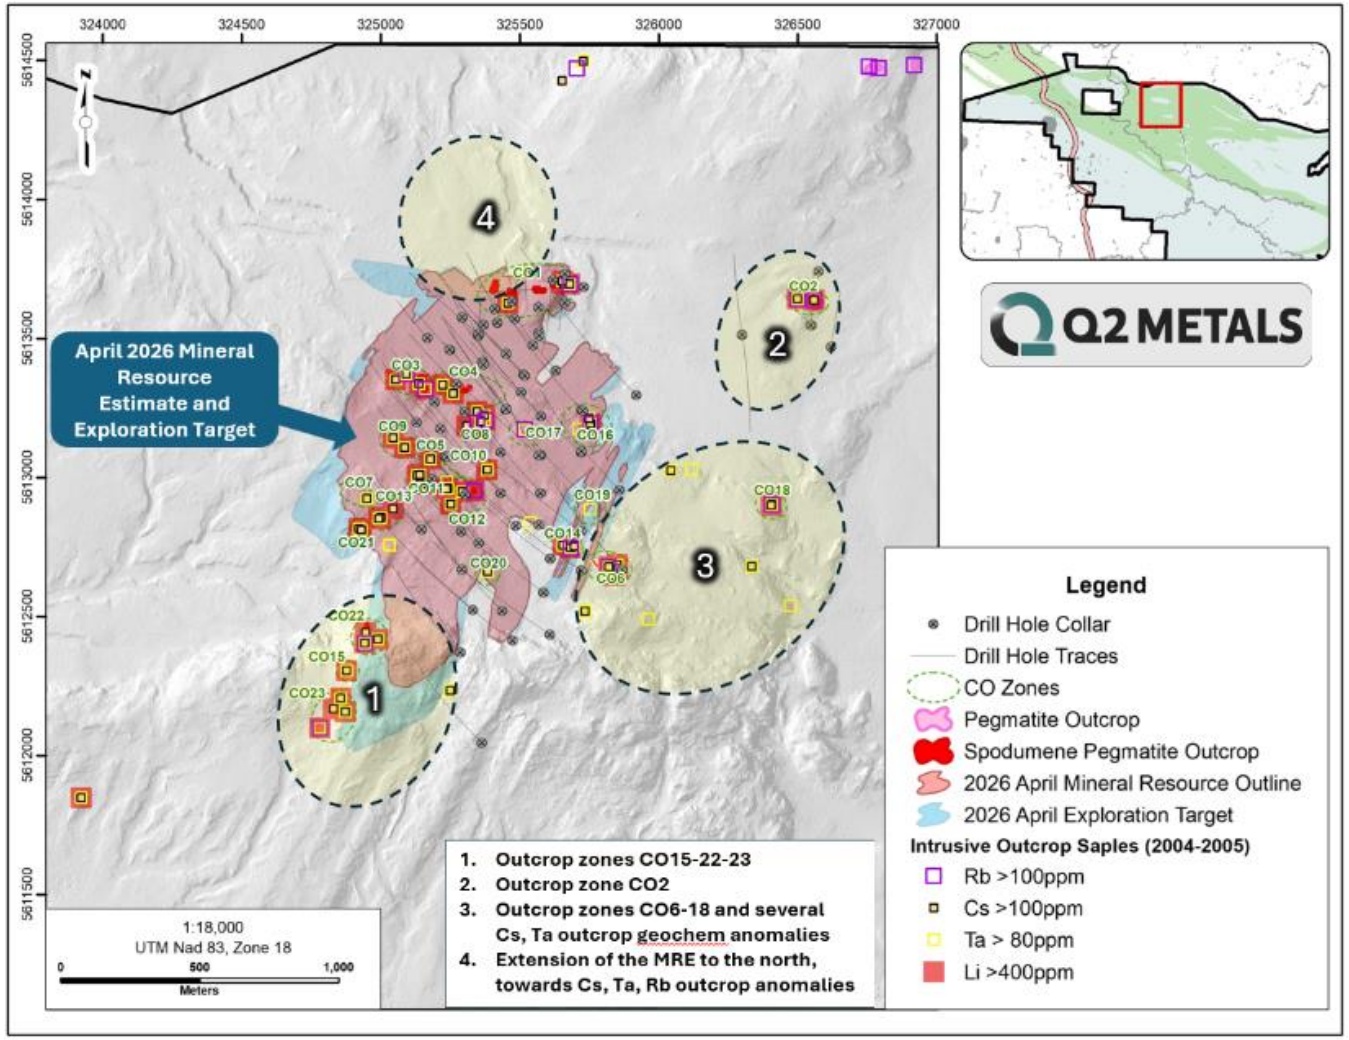

~69,500 m across 151 holes | 5 drills currently working

INFILL & EXPLORATION PROGRAM

- Continued infill and exploration drilling within main Cisco Deposit area.
- Expansion drilling as well as near-deposit.
- 2026 MRE only incorporated drilling completed to December 2025 with 33,343 m of drilling across 75 holes.
- **MRE Update**: Drilling is intended to convert Inferred resources to Indicated as basis for an updated MRE in 2027.

REGIONAL EXPLORATION

- District-scale exploration and drilling across the broader project area.

ENGINEERING

Metallurgy, Engineering Studies and Data Collection Programs:

- Phase 1 of metallurgy test work: three composite samples tested using HLS to confirm the potential suitability of a DMS process:
  - Composite 18: 74.1% recovery - 5.69% Li_2O concentrate - low iron of 0.42% Fe_2O_3
  - Composite 21: 69.6% recovery - 5.08% Li_2O concentrate - low iron of 0.55% Fe_2O_3
  - Composite 23: 71.6% recovery - 5.60% Li_2O concentrate - low iron of 0.46% Fe_2O_3
- Phase 2 of metallurgy test work in process:
  - Testing variability of recoveries across all pegmatite structures; and
  - Further refine flowsheet for the next phase of studies.
- Tradeoff and optimization studies with more detailed engineering:
  - Geotechnical
  - Condemnation drilling
  - Hydrogeological data collection programs

Phase I HLS Composite Summary

Drill Hole	Composite Name	Li_2O (%)	Fe_2O_3	Spodumene (%)
CS24-018	Comp 18	1.53	0.37	17.3
CS24-021	Comp 21	1.53	0.39	18.6
CS24-023	Comp 23	1.68	0.42	19.2

Phase I HLS Test Results Summary

Drill Hole	Composite Name	Cut Point SG	Recovery (%)	Li2O (%)
CS24-018	Comp 18	2.8	74.1	5.69
CS24-021	Comp 21	2.8	69.6	5.08
CS24-023	Comp 23	2.8	71.6	5.60

ENVIRONMENTAL

- Establishing a comprehensive understanding of existing environmental conditions in & around the Cisco Project and area;
- Supporting future project planning, permitting, engineering, and stakeholder engagement;
- Studies of water, wetlands, vegetation, wildlife, fish habitat, and other site-specific environmental conditions;
- Continued baseline studies based on the proposed mine design and layout, and associated activities;
- Initiation of the provincial/JBNQA Impact Assessment process through submission of a Preliminary Information Statement, followed by submission of a project description to initiate the federal impact assessment process.

COMMUNITY ENGAGEMENT

- Building a foundation for partnership and collaboration.
- Consistent and constructive open dialogue and engagement with stakeholders:
  - Cree Nation of Nemaska and Waswanipi;
  - Town of Matagami;
  - Eeyou Istchee James Bay Regional Government;
  - Tallyman and Landusers
- Expanded partnerships with Cree-owned and regional businesses.
- Community engagement supporting benefit events and initiatives.

Q2 METALS

OPPORTUNITIES & NEXT STEPS

OUR TEAM

KEITH PHILLIPS
Executive Chair, Director

Former CEO of Piedmont Lithium and 30+ years on Wall Street leading mining investment banking teams at Merrill Lynch, J.P. Morgan, Dahlman Rose. Former Head of Canadian Investment Banking Services for Goldman Sachs.

SIMON GAIVIN
VP External Affairs & Community Engagement

Businessman and entrepreneur with 20+ years in community relations and regional development. building strong relationships between economic, political, and community stakeholders.

JODY BELLEFLEUR
CPA, CGA
CFO

A CPA, CGA with over 25 years' experience, focusing exclusively on public companies for the last 15 years.

ALICIA MILNE
CEO, President & Director

Legal professional with 20+ years of experience in securities and corporate administration of public companies. Formerly the Corporate Secretary of Pretium Resources Inc.

JEAN-FRANÇOIS TREMBLAY
P. Geo
VP Technical Service

Geologist with 25+ years of technical and operational leadership experience advancing mineral projects from exploration through development and production readiness.

CHRIS ACKERMAN
LLB
Corporate Development

Mining professional with extensive experience in both government and private industry, including 15+ years in mineral exploration.

SAGE McCALLUM
P. Geo
VP Exploration, Director

Geologist with 20+ years in mineral exploration, specializing in hard rock lithium projects, including identifying PMET Resources' feasibility-stage Shaakichiuwaanaan project.

GENEVIÈVE MORINVILLE
Ph.D
VP Sustainability & Regulatory Affairs

Mining professional with 20+ years of experience managing environmental, social, and governance matters, primarily within Canada's mining sector.

JASON McBRIDE
IR Manager

Communications professional with 10+ years of experience across publicly traded and private sector organizations.

LEO POWER
MBA, MOGS, ICD.D
Independent Director

Energy & natural resources entrepreneur. MBA - Oil and Gas Studies (MOGS). Former advisor to a Sr. Federal Minister and to a former Premier of Newfoundland and Labrador.

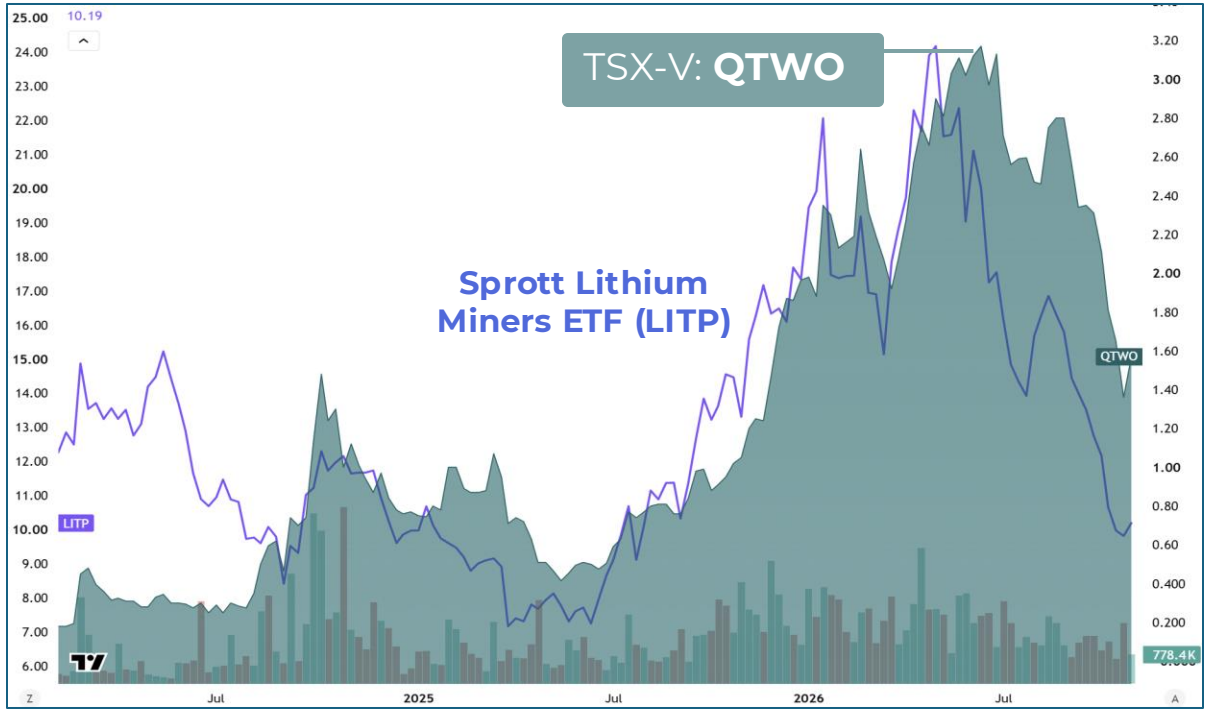

KEVIN BOTTOMLEY
Independent Director

Public company executive and capital markets advisor with an extensive global investor network.

SIMON COHN
B. Eng (Mining)
Independent Director

Mining engineer; Co-founder of Mining Projects Accelerator and a non-executive Director of MEC Mining, a global technical mining services consulting form.
